🌐 Bhiwani, Haryana

I am seeking a challenging job opportunity in computer science, aiming to contribute value to a dynamic company. As a hands-on professional, I stay current with industry developments, adapting swiftly to new technologies. With expertise in project management, I excel in assigning responsibilities and analyzing project status. Proficient in the Agile life cycle, I conduct trial runs, ensuring accurate results. A dedicated team player, I prioritize quality and thrive under pressure, coupled with effective communication and interpersonal skills. Eager to learn and tackle new challenges, I bring commitment and a proactive approach to my work.

Skills

- Programming Languages : JS, React, Node.js
- Database : MongoDB
- Tools : Eclipse, Visual Studio, Notepad++
- Scripting and markup : HTML, CSS, Bootstrap, tailwind, Debugging

Education

- Chaudhary Bansi Lal University 2021-2024
Bachelor of Science
- Govt. Sec. Sr. School(Kaunt) 2021
Intermediate
- Holy Child High School 2019
Matriculation

Experience

- **LetsGrowMore [Web Development (Internship)]** (AUG 2023 – AUG 2023)
I recently completed an online internship as a web developer with letsgrowmore, where I successfully undertook and delivered real-world projects, showcasing my practical development skills. In this role, I developed and maintained web applications using various technologies and tools. Collaborating remotely with cross-functional teams, I applied problem-solving skills to meet project requirements. This experience, including independent project work, not only enhanced my adaptability and self-motivation but also provided valuable insights into real-world development scenarios.
- **AttainU[Full Stack(MERN) Web Development (Training/Course)]** (AUG 2022 – MAY 2023)
I specialize in designing dynamic and multi-browser compatible web pages using HTML, CSS, React JS, and JavaScript, ensuring responsive interfaces with Bootstrap. My experience extends to both front-end and backend development, employing technologies like Node.js and Express JS. I excel in utilizing the Node environment, NPM, Express, and MongoDB with Mongoose.JS for server-side applications. Proficient in database creation using MongoDB, I possess a strong grasp of CSS elements and behaviors, including background, padding, table, animations, layouts, positioning, border, margin, and pseudo-elements. As a results-driven professional, I bring effective communication, leadership, team management, analytical, and coordination skills to deliver successful projects.

Academic Projects

- **Portfolio**
